Version 10/2/15

NYSPI IRB Approved
6235
10/16/2015 -> 3/6/2016

Does your child or teen…

- **Have trouble concentrating?**
- **Get distracted easily?**
- **Find it hard to sit still?**
- **Act or talk without thinking?**

If so, your child may be eligible for a brain imaging research study of an **FDA-approved medication** for **ADHD.**

Participation is **free** and involves:

- Comprehensive assessments
- MRI (magnetic resonance imaging)
- 3 months of behavioral therapy and/or medication

You and your child will receive up to $850 total compensation.

At the end of the study, we also offer 1 month of free treatment.

Please contact Dr. Jonathan Posner's study team at New York State Psychiatric Institute to learn more:
